## DETAILED ACTION

### Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 25-26, drawn to an antioxidant composition comprising a dichloromethane extract having antioxidant activity that is obtained from medulla and peel of tuberous roots of *Decalepis hamiltonii*.

Group II, claim(s) 27-39, drawn to a method for preparing an antioxidant composition, comprising: extracting medulla and peel of a *Decalepis hamiltonii* tuberous root with dichloromethane to obtain an extract having antioxidant activity, and thereby preparing the antioxidant composition.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: As Najarajan et al (Nagarajan et al, Chemical composition of the volatiles of *Decalepis hamiltonii* (Wight & Arn), Flavour and fragrance journal 2001; 16: 27-29, see IDS filed on 6/29/2006) teach the technical feature of: the roots were cleaned and separated from the central woody core and peel to yield the fleshy material. They were cut into small pieces, and subjected to steam distillation with 3 L water. The steam condensate containing a crystalline solid material, was extracted with dichloromethane (thus a

dichloromethane extract of *Decalepis hamiltonii*, thus with antioxidant activity) (see page 27, 2<sup>nd</sup> column, last paragraph), therefore, there is no special technical feature in the application.

Accordingly the groups are not so linked as to form a single general concept under PCT Rule 13.1., and therefore lack of unity of invention exists.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to QIUWEN MI whose telephone number is 571-272-5984. The examiner can normally be reached on Monday through Friday: 8: 30 am to 5: 00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, TERRY MCKELVEY can be reached on 571-272-0775. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
